

What do I do after the Sleep Study?

If you were seen at the CMD Sleep Disorders Center facility during the night:

For a PSG Study:

Please wait for our office to contact you. After we have reviewed and finalized the test results you may be asked to schedule a follow-up appointment and review the results with the sleep doctor, this generally takes about 10-15 business days.

For a CPAP/BIPAP and Split Night Study:

Either our office or your referring doctor's office or both will contact you to follow up after the report has been finalized by the sleep doctor, this generally takes about 10-15 business days.

If you were seen and/or referred by a non-CMD Sleep Disorders physician:

Most of the physicians usually request that you wait for their office to call you for a follow-up appointment after they have received and reviewed the test results. This generally happens within a 10-15 business days. If your doctor's office hasn't contacted you within 10-15 business days, please contact their office to verify that they have received your test results. If they do not have your test results, please have them reach out to us to request them. If your doctor's office has given you different instructions, please follow them.
