

Complete Forms in Patient Portal

You can complete forms prior to your visit using the Patient Portal. You will receive a notification email alerting you to complete an assigned form. Click the link included in the notification email to access the patient portal.

Go to the **Patient Portal** home page.

1. Log in to the portal. The **Patient Forms** icon displays with the number of forms to be completed.

2. Click the **Patient Forms** icon on the home page. The **Patient Forms** screen displays.
3. Click the **Start** button for a form. The form displays.
4. Complete the patient check-in forms and take the following actions based on the type of form you are completing:
 - **Exit** – Closes the form screen.
 - **Ask a Question** – Opens the **Messaging** screen in the Patient Portal.
 - **Save and Close** – Saves your work and closes the form screen. Form status changes to **Saved**.
 - **Finish and Submit** – Closes the form screen and sends the form back to the office for review. Form status changes to **Submitted**.
 - **Decline** (Consent Form) – Closes the form screen and send the form back to the office for review with no signature. Form status changed to **Submitted** in the portal Patient Forms grid.

Patient Portal Registration

Your experience with the patient portal begins with an email invitation from your doctor's office.

You will receive a **Patient Portal Account Notification** email after your doctor's office has added your account to the patient portal. Click the link included in the notification email to access the patient portal.

Register for the Patient Portal

When you first enter the patient portal, you must register and activate your account.

A screenshot of a web form titled "Complete Account Registration" overlaid on a background image of a man and a woman looking at a laptop. The form is divided into two main sections. The left section contains input fields for "Password", "Confirm Password", "Date of Birth", and "Last 4 Digits of SSN", separated by an "OR" line. Below these is a checkbox labeled "I have read and agreed to the Terms & Conditions." and a green "Register" button. The right section features social media login options: "Or connect with" followed by "Facebook" and "Google" buttons, and a blue "Log In" button under the heading "Already have an account?". At the bottom of the form, there is a footer with a location pin icon and the text "Address & Directions" on the left, and "Need assistance? Call (801) 984-6108" on the right.

The following information must be entered to register and activate a portal account:

- New Password

 **Note:** Passwords must contain a minimum of eight characters and include one upper case letter, one lowercase letter, one number, and one special character.

- And at least one of the following identifiers, if required by the practice:
 - Birth Date – MM/DD/YYYY
 - SSN – last four digits
- Read and agree to the **Terms & Conditions**
- Click **Register**

Once the account is registered and activated, you are automatically logged in to the patient portal.

Register Without a Patient Portal Invite

You can also register a new portal account by navigating to your practice's patient portal Login page and clicking **Register**.

The following information must be entered to register a portal account and receive a **Patient Portal Account Notification** email:

- Account Holder First Name
- Account Holder Last Name
- Account Holder Email Address
- Read and agree to the **Terms & Conditions**
- Click **Register**

You will receive a **Patient Portal Account Notification** email with a link to the **Complete Account Registration** screen. Follow the instructions above to complete your patient portal account registration.

Multi-factor Authentication

We have made your portal account even more secure by implementing multi-factor authentication (MFA) to ensure only authorized users are able to access your account. You will need to verify your identity by entering a code sent to your email.

Log in to the Patient Portal.

Verify Email for MFA

The first time you log in to the patient portal or create a new account, you need to set up your email for MFA.

A screenshot of the Patient Portal Two-Factor Authentication screen. The screen has a white background with a blue header bar containing the text "Patient Portal". Below the header, there is a section titled "Two-Factor Authentication" with a lock icon. The text "To better protect your health information two-factor authentication is required" is displayed. A progress indicator shows three steps: 1. Send email verification code (active), 2. Verify email code, and 3. Email verification completed. Under step 1, it says "A verification code will be sent to your email address at: tm*****@email.com". A blue button labeled "Send Code" is highlighted with a red rectangle. At the bottom, there is a link for "Help Files".

If the email address displayed on the screen looks correct, click **Send Code**. A verification code is sent to your patient portal account email address, and you can complete the MFA process.

MFA at Login

After your email address is verified, you will automatically receive an email with a verification code when you log in to the patient portal or reset your password for the patient portal.

1. Enter the six-digit code from your validation email and click **Verify**.

Notes:

- By default, the **Remember me for 24hrs** check box is selected. Clear the check box if you want to use MFA the next time you log in to the patient portal.
- The verification code expires after 15 minutes. You can resend a verification code as many times as you need. The **Resend** button is deactivated for 15 seconds after each attempt.

You can also copy and paste the code from your email.

The screenshot shows the 'Patient Portal' login interface. Under the 'Two-Factor Authentication' section, it states 'To better protect your health information two-factor authentication is required'. It prompts the user to 'Verify email code' and shows a code sent to 'ti*****@email.com'. A text input field contains the code '400112'. Below the input field is a checked checkbox for 'Remember me for 24 hrs'. At the bottom of the input section are two buttons: 'Re-Send' and 'Verify'. The 'Verify' button is highlighted with a red rectangle. Below the buttons, there is a note about checking spam/junk folders if the code is not received, and a link to 'Help Files' for more information.

2. Click **Continue** to access your patient portal account.

Notes:

- If you enter an incorrect verification code five times, your account will be locked for 15 minutes.
- The MFA screen times out after 15 minutes of inactivity. You will need to log in again to complete the MFA process.
- If you do not receive a verification email, check your Spam folder. You can also confirm your patient portal account email address is accurate with your provider's office.

Forgot Password

1. On the patient portal login screen, click the **Forgot Password** link.
2. Enter your email address.
3. Click **Send New Password**.
4. Click the link included in the new **Patient Portal Account Notification** email to reset your patient portal password.

Messaging in Patient Portal

Use messaging in the Patient Portal to send messages to and receive messages from your doctor or clinical staff. You can also include hyperlinks to third-party sites containing medical information for additional, comprehensive medical histories.

Important Note: Patient Portal messages might not be immediately seen or responded to. For immediate assistance, call the office directly. If this is an emergency, call **911**.

Receive Messages in the Portal

When you receive a message from your office, you are sent an email notification. Additionally, a number displays next to the Messaging icon to indicate how many messages are waiting to be read.

1. Log in to the patient portal.
2. Click **Messaging**. A new message is indicated by a red dot next to the date. Once a message has been opened, the red dot no longer displays.
3. Click a message to open it.
4. Respond to the message, if needed.

Send Messages from the Portal

You can click **Ask a Question** in the patient portal to send an email message to your practice or a specific provider.

You can also add hyperlinks for third-party sites (such as Fitbit[®] or MyZone[™]) to send to your provider or clinical staff. We recommend you use the hyperlink feature only when sending **Patient Health Information** portal messages.

Complete the following steps to send a **Patient Health Information** portal message:

1. Click **Messages**.
2. Click **Ask a Question**.
3. Select **Patient Health Information** from the **Subject** drop-down.
4. Enter a **Category**.
5. Enter the **Message**. Include the hyperlink to the third-party site in the message body.

Important Note: Copy and paste the link in its entirety. Do not forget to include the protocol (i.e., [http:](http://), [https:](https://)).

6. Click **Send Message**.
