I have either self-referred or have been referred by my physician to Comprehensive Medical Diagnostics, LLC for sleep therapy to further understand my medical condition.

I understand that I will be undergoing a sleep study. Electrodes and other sensors will be attached to my body. The tape used may cause discomfort during removal, and the tape may cause redness at the site of attachment. During the study, I can move freely in the bed. If I need any assistance or need to use the restroom, I will call for my technician at any time. My technician can hear me at all times. The monitoring devices are all connected to a small box, which is easily disconnected so that I may move around the center. I will be observed and videotaped on closed circuit TV throughout the study for assisting in the interpretation of my test. Any recordings obtained during the course of the sleep study will remain confidential and will be considered a protected portion of my medical record.

There are no significant risks to me from the test. The nature and purpose of the procedure, risks involved, and the possibility of complications have been fully explained to me. No guarantee or assurance has been given by anyone as to the result that may be obtained.

I hereby give permission to release any medical information from my physician to any consulting physicians in regards to this procedure. I also assign any benefits paid on my child or me to be paid directly to Comprehensive Medical Diagnostics, LLC. I understand that a separate bill for interpretation may be sent from the interpreting physician.
